AIP PUBLISHING HORIZONS CONFERENCE

Interfaces in Energy Materials Horizons Conference presented by APL Materials

Approximately 100 delegates convened on Trinity College at the University of Cambridge April 10-12 to attend the fourth installment of the AIP Publishing Horizons conference series, the Interfaces in Energy Materials Conference presented by *APL Materials*. The aim of the conference was to identify common challenges and build on knowledge scattered across the several otherwise disparate subfields in energy materials. Speakers presented brand new findings in the areas of thermoelectrics, solid-state batteries, solid-oxide fuel cells and interface electronics.

A panel discussion at the end of the conference provided an opportunity for the speakers and attendees to

summarize what they had learned, reiterate the importance of interfaces in materials, and establish a stronger connection between theorists and experimentalists working on similar systems. Overall, the conversations that occurred at the meeting provided conference attendees with valuable insight into the future of energy materials.

AIP PUBLISHING ATTENDS THE LAWRENCE LIVERMORE NATIONAL LABORATORY (LLNL) LIBRARY FAIR

AIP Publishing joined a number of publishers and vendors at the LLNL Library Fair from April 11-12 in Livermore, California. Researchers at LLNL got the opportunity to ask questions and gain insight into the scholarly publishing process. Those who attended the AIP Publishing session learned about copyright, reuse, and the rights and permissions authors have around their papers. The session also included helpful guidelines including how to get permission for figure re-use and specific details about the requirements LLNL researchers have as Department of Energy funded scientists.

To learn more about copyright and permissions, direct your researchers to AIP Publishing's Author Resource Center at <https://publishing.aip.org/authors>.

CALIS/DRAA CONFERENCE

Shanghai Jiatong University, China

Kevin Steiner and Xingtao Ai in Chongqing, China, May 16, 2018

AIP Publishing's Kevin Steiner and Xingtao Ai delivered a presentation at the annual DRAA conference attended by over 500 university librarians from across China. The presentation covered how AIP Publishing works to serve the research community and how we are engaged with the libraries in China.

PLATFORM TRAINING AT CALIS

Randy Kiefer, Senior Sales Manager

Randy Kiefer, Senior Sales Manager for AIP Publishing, presented training on the features of the Scitation platform, library support tools, author tools, and searching on the Scitation platform. The presentation was translated by Dr. Xingtao Ai from the AIP's Beijing office.

If you're interested in having AIP publishing conduct a training session at your institution, please contact your Sales Manager.

THE PHYSICAL SOCIETY OF JAPAN AND AIP PUBLISHING ANNOUNCE NEW PARTNERSHIP

Contract signing with JPSJ, May 2018.

From left to right: Prof. Hidetoshi Nishimori - Chair of the Publication Committee, Kevin Steiner - Head of Global Sales & Advertising at AIP Publishing, John Haynes - CEO at AIP Publishing, Prof. Hikaru Kawamura - JPSJ President, Prof. Tomi Ohtsuki - Chair of the Publication Committee as of March 2019, Prof. Kazuo Ueda - Editor-in-Chief of JPSJ

AIP Publishing and The Physical Society of Japan have announced a new marketing and sales partnership for the *Journal of the Physical Society of Japan (JPSJ)*.

JPSJ, the leading physics journal in Japan, has been publishing research in all fields of physics, from condensed matter physics to particle physics since 1946. AIP Publishing is excited for the opportunity of bringing JPSJ to a wider global audience in their mission to connect physical science researchers around the world.

To learn more about this partnership and JPSJ, contact your Sales Manager at: sales@aip.org.
